

ICB Cloud Backup Solution

Overview

Fuelled by affordable bandwidth and capacity optimization technologies, cloud backup is becoming a popular alternative to portable media, such as DVD, tape or an external hard drive. Although backing up on portable media is effective, they are much more vulnerable to damage and data loss. These methods can also be tedious and unpredictable, as a dysfunctional DVD-R drive could actually prevent you from saving any data to a disk. This can put your personal or business information at great risk when the time comes to restore critical data. When using online storage, your information is secured in an electronic vault, protected by the best data security available, and delivered by the #1 backup solutions provider; Acronis.

At a Glance

- *Making conventional backups costs time and effort. Making online backups is a fully automated process, which enables you to focus on your work instead.*
- *Disaster recovery is an inherent advantage of Cloud Backups.*

Backup Easier.

Backups are fully automated on a daily basis or on a frequency set by yourself. This means you never have to get involved with taking backups offsite, switching tapes incurring the risk of faulty portable media.

Backup Everything.

ICB backs up everything on your servers & computers including your operating system, and applications. Pick what data you want to backup—a folder, all your files or the entire computer.

Backup Efficiently.

ICB de-duplicates, compresses, and backs up incrementally to backup online. Have the same document stored twice? ICB will de-duplicate to back it up just once; if you restore, it will be put back in both places.

Backup Safer

You will receive an e-mail notification with a comprehensive report detailing success of your backup. This form of reporting puts you in total control of your backup process.

Backup Versions.

While restoring files you can choose from many different versions - yesterday, last week, three months ago and so on.

Key Benefits

- *Keep important information safe and accessible.*
- *Security and piece of mind at affordable rates.*
- *Software expenditures decrease due to the reduced cost of subscription software.*
- *Duplicate copies are stored in a remote location.*
- *Backs up everything on your servers & computers including your operating system, and applications.*
- *E-Mail notification with a comprehensive report detailing success of your backup.*

Why IES Group?

IES Group has over a decade of experience implementing complex IT Solutions empowering quick real time information based decisions.

ICB Cloud Backup Solution

Which one is right for you?

Features

	ICB	Tape Backup	Other Cloud Services
Make the things you do every day easier with hands free on and off site backup.	✓		✓
Make you experience seamless, and backup your SQL Server, Exchange Server & VM's.	✓		
Easily restore to dissimilar hardware in the event of a server failure or natural disaster.	✓		
Run file level, VM and true image backups simultaneously with version control.	✓		
Secure access to all your files remotely using any internet browser.	✓		✓
Keeps snap-shots of important business data for long term storage and compliance.	✓		✓
Network Attached Storage (NAS) system included with service offering.	✓
